**Visiting The Surgery —**  
On the back page you can see when your doctor will be in the surgery. If you call, telephone or send a message in advance to make an appointment you will be seen promptly and not have to come early to get a place in the queue. If you really need your doctor urgently he will always see you during the hours stated, without an appointment. In that case you will be fitted in as soon as possible. When your doctor tells you that he wants to see you again, tell the receptionist on the way out and make an appointment for your return visit.

If you require a repeat prescription only and do not wish to see your doctor, you can obtain this without an appointment by coming to the surgery during surgery hours.

**Sending for the Doctor —**  
If you want the doctor to call please telephone or send a message before 10 a.m. then he will come as soon as possible. If you ask after 10 a.m. it is more difficult for the doctor to plan his visits and there will be more delay before he can call.

**Week-Ends —**  
Saturday evening surgeries and week-end calls will be taken by the duty doctor, whose name will be posted on the surgery door. The duty doctor can also be telephoned at Halstead 2173 or Halstead 2240.
